WORK EXPERIENCE

Brihaspathi Technologies Limited
Junior Software Developer

JULY - 2024 - PRESENT

- I am a junior developer using React. I am also capable of handling full-stack development and can work on MERN stack projects. On a daily basis, I collaborate with my team to build responsive, user-friendly web applications, ensuring a seamless user experience. I am constantly learning and improving my skills in JavaScript, React, Node.js, Express, and MongoDB to stay up-to-date with the latest technologies.

PROJECTS

Visitor Management System

- I worked on both the frontend and backend of a Visitor Management System, contributing to the development of a seamless user interface and robust server-side logic to manage visitor data effectively

AI Chatbot

- I was involved in developing the frontend for an AI chatbot, focusing on creating an intuitive and user-friendly interface to enhance user interaction with the chatbot.

Trinai - Static Website

2024 - 2025

- I developed a static website for Trinai using React, showcasing their CCTV product offerings and brand identity with a clean and responsive layout.

Zinggy Multi-Cuisine Restaurant Website

- Developed a responsive static website for Zinggy Multi-Cuisine Restaurant to enhance their online presence and support business promotion. The website showcases the restaurant's menu, ambiance, contact details, and special offerings, helping customers easily explore services and boosting overall visibility.
